EXPERIENCE

Software Engineer, ClickFunnels – 06/2022—02/2024, remote

Collaborating with the Bullet Train framework team and leveraging technology to create innovative solutions, such as the jbuilder-schema gem and api_models gem, enabling auto-generating OpenAPI 3.1 documentation and Ruby clients.

Software Engineer, Evrone – 04/2021—06/2022, remote

Enhanced and updated microservices for a nationwide real estate registry system, using technology to drive social impact in the housing industry.

Software Engineer, IT Department of the City of Moscow – 10/2018—07/2021

Developed web services and APIs for an extensive educational platform, improving accessibility to online learning resources for over 10 million users.

Software Engineer, Viasat – 03/2017—10/2018, remote

Contributed to the creation of a scalable online video streaming service, enabling the sharing of movies, art, and cultural experiences through optimal performance.

Founder & Software Engineer, Web Automatics – 10/2011—06/2018

Led a talented team of engineers to deliver high-performance web applications for clients in diverse industries such as news, education, and finance. Gained experience in organizing tech conferences, encouraging knowledge sharing and networking within the community. Launched "Traveltrack", a project revolutionizing travel planning and fostering social interactions through a cutting-edge backend algorithm and mobile API.

Software Engineer, Vector Telecom – 08/2006—03/2008

Devised and maintained the organization's primary website, creating web solutions and programming impactful ad banners for promotional initiatives.

Software Engineer, Interfax – 12/2004—07/2006

Created programs to efficiently showcase the company's values digitally.

AIM

Integrating passions like travel, music, and art with work to drive social impact, expand expertise, and enhance global connections through shared experiences, enabled by technology.
