WebServices/API's	Bootstrap		Slack
Heroku, AWS, VPS	Adobe Design apps		

EXPERIENCE

Software Engineer, ClickFunnels, remote – 2022 — present time
As a contributor to the Bullet Train framework team, also independently developed the `jbuilder-schema` gem for auto-generating OpenAPI 3 documentation from Jbuilder templates, and the `api_models` gem for producing ActiveRecord-style models from OpenAPI 3 documents, facilitating Ruby client use for any documented API.

Ruby Backend Engineer, Evrone, remote – 2021—2022
Enhancing and updating microservices for the nationwide real estate registry system.

Senior Backend Developer, IT Department of the City of Moscow – 2018 — 2021
Developed web services and APIs for an education platform with 10+ million users.

Software Engineer, Viasat, remote – 2017—2018
Developed a scalable online video streaming service for optimal performance.

Founder, Traveltrack – 2014—2017
Created a pet project for tracking visited cities, planning routes, and forecasting friend meetups. Developed a highly accurate backend algorithm and API for mobile app integration.

Also worked with
Archpolis, Soundaround, Waveform Moscow, Dahon, Interfax, Experian,
Moscow Business Dialogue forum, Ilyushin Aviation Complex OJSC

And
Developed a 2012 Russian presidential election observer app; organized a 2013 iOS/Rails conference in Crimea; created various systems such as news channel ratings, school and private seller social networks, website monitoring, exhibition info management, financial assistance, and sailing tour aggregation.

AIM

Integrating passions like travel, music, and art with work to drive social impact, expand expertise, and enhance global connections through shared experiences, enabled by technology.
